ALPEN-ADRIA UNIVERSITÄT KLAGENFURT

Invitation to a Guest Lecture

Cyril Banderier

CNRS/Univ. Paris Nord, France

"The (im)possibles in mathematics and computer science."

N.0.07 | Tuesday, 30 July 2019 | 10:30 a.m.

Abstract

This talk will illustrate, via short historical references, how mathematicians can sometimes encounter problems which are a priori impossible to solve, and why this was however finally fruitful for the advances of science!
This talk will be accessible to high school students and will include nice examples from physics, biology, computer science, and... combinatorics, a field dear to the heart of the Klagenfurt team of mathematics.

Andrei Asinowski and the Department of Mathematics look forward to seeing you at the talk!
